SUMMARY

A passionate full-stack software engineer with a strong commitment to learning, problem-solving, and precision. As a recent graduate of an intensive six-month bootcamp, I am eager to bring my innovative thinking and technical expertise to your team, contributing to impactful projects and driving success through creative solutions.

EXPERIENCE

Full-Stack Developer Trainee

Boolean

📅 03/2024 - Present

- Acquired proficiency in JavaScript and essential development tools, including version control systems like Git, and contributed to over 50 code repositories.
- Acted as Scrum Master during a 4-week team development simulation, collaborating on an existing codebase. This experience involved practicing Kanban and Agile methodologies, conducting stand-ups and retrospectives, and applying best practices for branching, managing merge conflicts, and handling pull requests.
- Showcased adaptability and a strong willingness to learn by quickly mastering new concepts and technologies throughout the course.
- Utilized this experience to strengthen foundational skills and prepare for a successful transition into a junior software developer role.
- Collaborated with a team of experienced developers to gain insights into real-world projects and industry best practices.

Junior Freelance React Developer

DeGrowLab Kombucha

📅 03/2023 - 05/2023   📍 Utrecht NL

- Developing modular components for a CMS driven website.
- React Website, converting Figma designs into components that consume structured data and styled with styled-components.
- Introduction to typescript through mentorship.

PROJECTS

Spotify Homepage

🔗 https://github.com/iscreamvann/html-spotify-challenge

One of my first proper projects from my time at Boolean, This is a static homepage that replicates Spotify - Using HTML & CSS.

Reel Moments

🔗 URL

Reel Moments is a fishing logbook app I developed to help anglers track and enhance their fishing experiences. It allows users to log details of each trip, such as location, bait used, and species caught, all through a user-friendly interface on their personal devices.

My Portfolio

🔗 https://main--kylevannportfolio.netlify.app/

Built a responsive portfolio with React, featuring interactive project cards and a modern, adaptable navigation bar. The site maintains a professional design and seamless functionality across different screen sizes.

Cohort Dashboard

A Social-media style application built using React and utilising CRUD.

SKILLS

Full-Stack

React   JavaScript   HTML   CSS

Node.js   Express   PostgreSQL   OOP

Agile   Tailwind   Prisma

Other

Git   Jasmine   Docker   AUTH

RESTful APIs   TDD   GitHub   Postman

EDUCATION

Full-Stack Software Development

Boolean UK

- **Certificate**

GCSEs

The Hazeley Academy

- Obtained 4 GCSEs Including Maths and English

STRENGTHS

Tactical Thinker

Being a tactical thinker is valuable at work because it involves making strategic decisions and solving problems. This skill helps prioritise tasks, anticipate challenges, and ensure projects are completed successfully and on time.

Resilient

Being resilient in the workplace helps me navigate challenges and setbacks. It allows me to stay focused and adapt to changes, maintaining productivity and a positive attitude even under pressure. This resilience supports problem-solving, helps me recover quickly from obstacles, and contributes to a more dynamic and successful work environment.

Communication

Good communication helps me reduce errors, foster teamwork, and align goals, which boosts productivity and improves problem-solving.
