SUMMARY

Junior web developer with a front-end focus, trained in full-stack development through a full-time, 6-month intensive course at Boolean, completing over 1,000 hours of coding. I specialize in JavaScript, React, and responsive design, creating user-friendly interfaces. In addition to contributing to over 50 repositories, I dedicate my spare time to coding, continually refining my skills and building functional web applications. I am eager to bring my expertise to deliver impactful digital experiences.

EXPERIENCE

Junior Freelance React Developer

DeGrowLab Kombucha

📅 09/2024 - Present 📍 Utrecht, NL

- Designed and developed modular React components for a CMS-driven website, ensuring scalability and reusability.
- Improved user interface functionality by translating Figma designs into responsive React components.
- Gained foundational knowledge of TypeScript through hands-on mentorship, enhancing code reliability and maintainability.
- Collaborated with the team to integrate structured data, ensuring seamless content management and website functionality.

Full-Stack Developer Trainee

Boolean

📅 03/2024 - Present 📍 Milton Keynes, United Kingdom

- Gained expertise in JavaScript and essential development tools, including Git, GitHub, and other version control systems, while contributing to over 50 diverse code repositories.
- Participated in a 4-week team development simulation, enhancing skills in Kanban and Agile methodologies, including code collaboration on an existing codebase.
- Strengthened knowledge of branching strategies, managing merge conflicts, and submitting effective pull requests, ensuring streamlined team workflows.
- Rapidly learned and applied new technologies and frameworks, demonstrating adaptability and a strong commitment to continuous professional growth.
- Collaborated with a team of seasoned developers to work on real-world scenarios, refining technical problem-solving abilities and understanding of industry best practices.
- Developed a robust foundation in full-stack development, preparing for success in dynamic and fast-paced development environments.

Projects and Development

- NFT Collaboration:** Co-creating a platform focused on NFTs, exploring Blockchain integration, and designing a user-friendly interface for showcasing digital assets.
- Football API Project:** Developing a React-based app to display football fixtures, standings, and statistics, leveraging real-time data from a football API.
- Continuous Learning:** Actively studying new technologies, frameworks, and tools to enhance my front-end development expertise, including TypeScript and advanced CSS techniques.

EDUCATION

Full-Stack Software Development

Boolean

- Full-Stack Software Development Course [Certificate](#).

GCSEs

The Hazeley Academy

- 5 GCSEs, Including Maths and English.

SKILLS

React	HTML	CSS	JavaScript
Node.js	Express	PostgreSQL	OOP
Prisma	Tailwind	Prisma	Git
Github	Jasmine	Docker	Postman
TDD	RESTful API's	AUTH	

PROJECTS

Personal Portfolio

🔗 <https://main--kylevannportfolio.netlify.app/>

A React and Tailwind CSS portfolio featuring CSS animations, responsive design, and personal projects with descriptions and links, showcasing my front-end expertise.

- [GitHub Repository](#).

Above The Fold Challenge

🔗 <https://above-the-fold-challenge.netlify.app/>

A fully responsive React project built with styled-components, replicating an existing website for an interview challenge. It adapts seamlessly from desktop to mobile.

- [GitHub Repository](#).

Fishing Logbook Application

For my final project at Boolean, I created a web application that lets fishermen log details such as catch dates, weights, locations, species, breed, rarity, and personal experience. I developed both the front-end and back-end, ensuring a user-friendly and functional app.

- [Front End Repository](#).
- [Back End Repository](#).

Responsive List Application

🔗 <https://lotsoflists.netlify.app/>

A responsive list web application built with React, allowing users to sort items by date and priority, with a seamless experience across desktop and mobile devices.

- [GitHub Repository](#).

Spotify CSS Replica

🔗 <https://spotify-replica-kv.netlify.app/>

A CSS replica of Spotify, created as my first challenge with Boolean to showcase my progress. This project helped me strengthen my CSS skills and ability to replicate real-world designs.
